### SAFETY TIPS

1. Be sure your children know their full name, as well as yours, their phone number, including area code, and address, including the state.
2. Tell your children to never talk to strangers; a stranger is someone they don't know well.
3. Teach your children to always walk in groups when possible. Make sure you know your child's walking route to and from school.
4. Teach children how to use pagers and cell phones in case of an emergency.
5. Keep this document and current photos in a safe place.
6. Develop two (2) code words or phrases, known only by you and your children.
